UTAH SAFETY CONSULTANT

DAY-OF PACKING LIST

What to bring

Pack the night before. Follow the site's own PPE rules if they are stricter, and still bring the basics below.

Pack the night before. Check each item as it goes in the bag or in the truck. If a site has told you a different PPE list, follow the site list and still bring the basics below.

PPE — wear or have ready

- ☐ Hard hat (in good condition, no deep cracks, suspension intact)
- ☐ Class 2 or Class 3 hi-vis vest or shirt (Class 3 if you will be near traffic or night work)
- ☐ Safety-toe boots
- ☐ Safety glasses (clear and tinted if you have both)
- ☐ Work gloves
- ☐ Hearing protection (ear plugs or muffs)
- ☐ Weather layer (rain jacket, warm hat or sun protection, as the day requires)

> Bring fall protection, a respirator, or FR clothing only if the site requires visitors to wear them and you are trained and fit-tested as required. If you are not, stay out of those areas and say so in the opening meeting.

MSHA-site extras

- ☐ Confirmation that site-specific hazard training (30 CFR 46.11 or 48.31) is arranged before you arrive
- ☐ Steel-toe boots and hard hat you can get dirty; some mines will not accept a bump cap
- ☐ Space on the calendar for the escort and training — do not show up expecting to walk in
- ☐ Your own high-visibility clothing if the mine requires a specific color

Tools and records

- ☐ Phone with this app installed, opened once online, and tested in airplane mode
- ☐ Phone charger and a charged power bank
- ☐ Laptop or a way to send the report later (the phone is enough on site)
- ☐ Tape measure
- ☐ Flashlight or headlamp
- ☐ Notepad and pen (backup if the phone dies)
- ☐ Printed one-page field checklist, opening/closing scripts, or this gear list if you want paper
- ☐ Business cards
- ☐ Water and a simple lunch — do not assume you can leave a remote site at noon

Only if the scope includes them

- ☐ Four-gas meter, calibrated, if a trench or confined space is in the quoted scope and you are trained to use it. If you are not trained, do not enter; observe from a safe location or note that the area was not entered.
- ☐ Spare batteries or charging cable for the meter

Before you leave the house

- ☐ Quote and signed agreement packed or available as a PDF on the phone
- ☐ Job created in the app, industry selected, address and contact in Step 1
- ☐ Pre-visit email sent; you know where to check in and who the escort is
- ☐ Directions and a time cushion for the drive
- ☐ Darren’s number in your phone: 435-901-9601

Templates and training tools only. Confirm regulations against the current CFR and any Utah (UOSH) state-plan rules. The client remains responsible for its own safety program and compliance. No credentials or licenses are claimed on these pages.
